Experience

Full Stack Developer | MERN Stack, Firebase, Razorpay, Ekart | [Live](#)

Apr 2025 – Nov 2025

Sutr Clothing

- Developed scalable microservices for production deployment, serving 100+ monthly customers with stable order and payment workflows
- Implemented secure payments and real-time logistics integration via Razorpay and Ekart service endpoints with reliable error handling, reducing payment failures and delivery delays
- Built and optimized a modular admin dashboard and responsive User Interface following MVC principles, Tailwind CSS, and reusable components, reducing UI defects through unit testing and validation

Projects

DiaChat – Fine-Tuned LLM for GenZ | *Unsloth, WebGPU, WebAssembly, MLC-LLM, MERN* | [Live](#)

Mar 2025 – Feb 2026

- Curated and engineered a high-quality NLP dataset on Hugging Face to train a personality-driven conversational model with empathetic, Gen Z-style dialogue
- Fine-tuned Gemma-3 1B Instruct with PyTorch and Unsloth, optimizing inference to achieve ~40 tokens/sec with low-latency streaming responses
- Deployed on-device model inference pipeline by converting weights to MLC format and compiling WebAssembly runtimes via WebLLM and WebGPU for low-latency browser inference
- Repository Link: <https://github.com/DiaLabs/dia-chat>

FitCheckr – Virtual Try-On System | *Next.js, Node.js, Gemini 2.5 Flash-Image API, REST APIs* | [Live](#)

Aug 2025 – Sep 2025

- Engineered an AI-powered virtual try-on system powered by Gemini 2.5 Flash-Image and Next.js with modular backend services and image-processing pipelines
- Optimized inference and API workflows, achieving average image response times under 3 seconds across 95% of requests for real-time previews
- Shipped and deployed a Chrome extension integrating secure service interfaces for instant virtual try-ons across major e-commerce platforms and marketplaces, driving higher click-through and try-on usage rates
- Repository Link: <https://github.com/iteshxt/fitcheckr>

DiaMod – Multi-platform Moderation System | *Python, REST APIs, Microservices, JWT, MERN* | [Live](#)

Jan 2025 – Mar 2025

- Designed and architected a centralized moderation system for Discord, WhatsApp, and Telegram through scalable RESTful APIs and modular architecture, enabling consistent policy enforcement
- Automated profanity filtering, spam detection, and progressive warning pipelines for automated and scalable community management
- Integrated Google Gemini services to generate summaries and contextual replies, supported by a real-time dashboard with secure QR-based authentication
- Repository Link: <https://github.com/DiaLabs/dia-mod>

Certificates

Mobile Application Development using Flutter

Jul 2025

Cipher Schools — [Link](#)

Cloud Computing

Apr 2025

NPTEL — [Link](#)

Computer Communications Specialization

Oct 2024

Coursera — [Link](#)

Skills

Languages: C++, Java, JavaScript, Python, TypeScript, Shell Script

Technologies/Frameworks: React.js, Next.js, Node.js, Flutter, Git, GitHub, Docker, Vercel, AWS(EC2, S3), Linux

Domain Skills: Data Structures and Algorithms, Responsive Web Design, Pytorch, Fine-Tuning(LoRA, PEFT), RAG, LLMs

Soft Skills: Problem-Solving, Rapid Adaptability, Strong Work Ethic, Self-Driven Learning

Education

Lovely Professional University

Aug 2023 – Jun 2027

Bachelor of Technology - Computer Science and Engineering — CGPA: 8.48

Phagwara, Punjab

Kiddys Corner Hr Sec School

Apr 2021 – Mar 2022

Intermediate — Percentage: 78

Gwalior, Madhya Pradesh

Amar Public School

Apr 2019 – Mar 2020

Matriculation — Percentage: 90

Gwalior, Madhya Pradesh
